

# Plak-Vac® Solutions for Long-Term Care

Oral hygiene programs in long-term care facilities are challenged by resident needs that may vary from full independence through complete dependency. Until now, choosing and providing the proper oral care products for this wide range of patient care has been difficult because of the lack of a single, comprehensive source for oral care products that meet the needs of the long term care facility.

The Plak-Vac Oral Care System offers products for the continuum of patient care. From high quality, toothbrushes and toothpaste to specialized products for the dependent patient, including suction toothbrushes suction swabs, and a portable suction system, Plak-Vac products can help overcome many of the obstacles to the implementation of a comprehensive oral care program in the long-term care setting.

Plak-Vac oral care products are cost-effective and meet the care requirements for residents from the fully independent to the most dependent, and our educational programs, including oral care protocols, staff education, inservice support and posters facilitate implementation and on-going success.
